Business Requirement Document (BRD)

Project: E-commerce Platform for Electronic Gadgets

Prepared By: Somya Agarwal

Date: 23-09-2025

1. Introduction

This document outlines the business requirements for developing an e-commerce platform that will enable customers to browse, purchase, and manage electronic gadgets online. The BRD captures the high-level objectives, business needs, and functional expectations for the platform.

2. Business Objectives

The primary objective of this project is to design and develop a user-friendly online marketplace dedicated to electronic gadgets. The platform aims to provide customers with a wide range of products supported by secure payment options, while ensuring a smooth and reliable shopping experience. By offering transparent product details, genuine reviews, and clear order tracking, the platform seeks to build customer trust and encourage repeat purchases. At the same time, it will enable the client to expand their customer base, strengthen their digital presence, and increase revenue through online sales.

3. User Personas

1. **Harshil – The Early Adopter**
    - Loves exploring the latest gadgets and features.
    - Reads product specifications in detail before buying.
    - Wants side-by-side product comparisons and trusted reviews.
    - Prefers a fast delivery and hassle-free payments.
2. **Jyoti – The Working Professional**
    - Juggles a busy schedule and prefers straightforward shopping.
    - Needs fast search, filter options, and reliable delivery.
    - Expects secure payments and an easy checkout.
    - Values customer support if something goes wrong with her order.
3. **Nish – The Occasional Buyer**
    - Shops only during sales or for special occasions.
    - Likes curated lists such as “Top Deals” or “Gifts under ₹5000.”
    - Appreciates discounts, offers, and gift packaging services.
    - Relies on customer ratings and recommendations for decision-making.

4. Scope

In-Scope

- User registration and login functionality.
- Product catalog with browsing, filtering, and search options.
- Detailed product pages with images, pricing, and specifications.
- Shopping cart and checkout process with multiple payment options.
- Order confirmation, tracking, and history.

Out of Scope

- Integration with third-party marketplaces (e.g., Amazon, Flipkart).
- Advanced features such as AR/VR product previews.
- Loyalty programs or subscription models (may be considered in future phases).

5. Stakeholders

- Client/Business Owner – Initiates the project, defines goals, and provides approvals.
- End Customers – Will use the platform to browse and purchase gadgets.
- Business Analyst – Responsible for gathering, analyzing, and documenting requirements.
- Development Team – Designs and builds the platform based on requirements.
- Testing/QA Team – Validates system functionality and performance.

6. Functional Requirements

1. **User Registration & Authentication**
    - Users should be able to create an account using email or social logins.
    - Secure login, logout, and password recovery features must be included.
2. **Product Browsing & Search**
    - Category and filter-based navigation.
    - Search bar with keyword and filter options.
    - Suggest products based on browsing history.
3. **Product Details**
    - Product pages must display images, specifications, pricing, and availability.
    - Customers should be able to view ratings/reviews.
    - Option for viewing similar products.
4. **Shopping Cart & Checkout**
    - Add/remove items from the cart.
    - Multiple secure payment options (credit card, debit card, UPI, wallets).
    - Order summary before final purchase.

5. **Order Management**
    - Automatic order confirmation emails/SMS.
    - Order tracking and delivery updates.
    - Option to cancel before dispatch.
6. **User Account Management**
    - View and update personal details.
    - Manage saved addresses.
    - Access order history.

7. Business Constraints

- Platform must be optimized for both web and mobile devices.
- The system should comply with industry standards for security (e.g., SSL, PCI compliance).
- Budget and timeline are limited to the client's initial project phase.

8. Success Criteria

- Customers can complete purchases smoothly with minimal steps.
- Orders are successfully tracked and delivered within committed timelines.
- The system remains stable and secure under expected traffic loads.
- Positive customer feedback and repeat purchases post-launch.

9. Approval and Sign-off

The undersigned acknowledge that they have reviewed the Business Requirement Document (BRD) for the *E-commerce Platform for Electronic Gadgets* project and agree with the requirements outlined. Changes to this document will follow the organization's defined change management process.
